

EnergySec Community

Three Things You May Not Know About EnergySec

We are over 15 years old!

We are the leading provider of NERC CIP Education.

We are an independent, non-profit organization.

Five Reasons You Should Get Connected

Be part of the industry's leading voice for cybersecurity in the energy sector.

Associate with people who have vision, purpose, and desire to share knowledge, capabilities, and enhance the security of the power grid.

Have access to unparalleled energy sector information resources.

Learn with webinars and regional events that focus on the latest cybersecurity developments.

Gain valuable lessons learned from people who have industry-specific cybersecurity problem-solving experience

Community is at the heart of EnergySec's mission to provide resources and support to organizations in securing their critical infrastructure.

Why Community? The expertise and knowledge from a group of dedicated professionals who work together strengthens our ability to thwart cybersecurity threats. That's community!

EnergySec's community includes individuals from a broad range of utilities, industry product and service vendors, academic institutions, national labs, regulatory organizations, and government entities, with formal membership representing 160 electric utilities having headquarters in 25 states and operations in several others. In addition to our formal membership, numerous other utilities participate in our community events and educational programs. Our membership and participation ranges from the largest utilities in North America to small local utilities with less than 250 employees.

EnergySec's Community Site

*EnergySec launched its **NEW** Community Resource Site in January, 2022. What can you find there?*

Non-member Resources Non-members can find information on our staff, upcoming events, news relevant to our industry, career information, education information, etc.

Member Resources include all of the above resources plus our NERC CIP resources (Tracker, CIP News letters, CIP calendar, CIP resources, etc.), member discount codes for events and programs, security news, ICS updates, briefings, etc.

Education Our Education Site provides information on our on-demand courses, our Certified CIP professional (C3P), Certified CIP Technician (C2T), instructors, in-person and online, instructor-led opportunities.

Career Hub. Find our Navigation center here for employers and workers. Also learn about our Secure Power Systems Cybersecurity Technician apprenticeship. Interest forms are available on our website and sharepoint site for more information.

Security-Focused Information. Here you will find brief write-ups on security-related news topics, vulnerability and advisory notifications, a weekly ICS round-up, and a list of upcoming security events and webinars. with government agencies, academic programs, and utilities.

Collaboration groups. A great place to join a collaboration group, whether related to apprenticeship development, volunteer opportunities, etc.

Small Utility Resources. We are in the process of developing resources specifically to benefit small utilities.

Not a part of our Community? To join our community, go to energysec.org and register under the tab - Join our Community. Start enjoying the benefits of Community today!
